- We recommend [Adobe Digital Editions](#).

You only need to do this once.

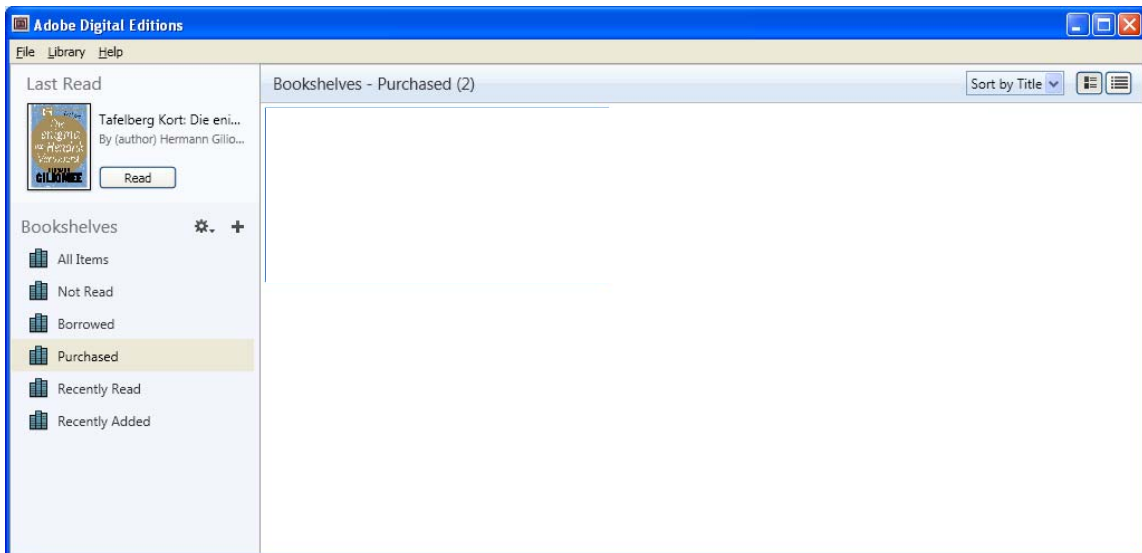

- The first time you open the application (the app) on your computer, you'll need to authorise the computer. That means you have to link your Adobe registration details (which you set up in **Step 1**) with the software.

- Once you've activated that, you'll see your empty Library.

Step 3: Download the eBook onto your computer

- Go to the website where you want to buy your book from in your computer's web browser.
- Buy the ebook as you would a normal printed book.
- If your purchase was successful, you will find your ebook in an e-library on that website. For example, at Kalahari.com you will find it in your *LibraryBox*; LeisureBooks.com will place it in the *eLibrary*. Other online stores may have different names for the library.
- Download the ebook to your computer. Click it, and choose Open. This will place the book in the **Digital Editions** library.
- *Alternatively*, save the file somewhere on your computer where you'll be able to easily find it again. The file name will end with the letters *.ascm*. When you double click on that file, the books should appear in **Digital Editions**.
